08 India

09 Malaysia

Our values lead our way:

Quality ■ Efficiency ■ Excellence

Our services, your success

With over 200 years of collective experience, we are the industry's independent sand control advisory. We provide design and evaluation software, consulting, and training services globally for all completion environments. We are the sand control experts, explore how we can help you today:

Software

Our industry standard software empowers you to take the best engineering decisions at every stage of your sand control projects.

Trusted by all major Operators and Service Companies around the world to enhance completion reliability and improve efficiency.

Consulting

We foster a collaborative partnership, working closely with you to develop optimized solutions for your sand control challenges.

Independent and impartial support across all stages of field life, from FEED to remedial.

Training

We help you cultivate, sustain and enhance in-house sand control expertise.

Courses are customized for your specific requirements and delivered globally by our recognized sand control experts.

Our sand control software services enhance completion reliability, improve efficiency in operations and empower your well engineering decision making.

They feature intuitive, user-friendly interfaces and workflows that evolve with the latest technology and your changing needs.

With impartial guidance and engineer-centric design, our sand control software and global expert support ensure you are always in capable hands.

PackPro

- **Complete solution:** The industry standard solution for sand control design, evaluation and optimization.
- **Reduce NPT:** Identify and mitigate risk at every stage of your sand control operation.
- **Fast calculations:** Provides rapid, accurate results for quick decision-making.

DataPro

- **Big data optimization:** Easily handle large data sets and all open data formats.
- **Customizable analysis:** Define custom math equations for detailed analysis.
- **Tailored insights:** Strategic decision-making with configurable charts and powerful reporting tools.

The industry trusts us

DuneFront supports a wide range of companies with their sand control requirements, including all major Operators and Service Companies as well as many mid-sized and independent companies. Our services scale to meet your needs, however large or small.
