

DuneFront

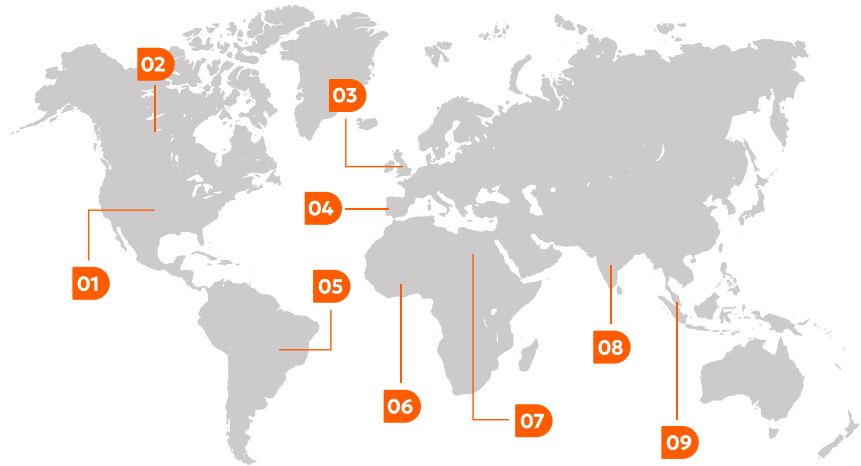

The Sand Control Experts

Meet us

We are the experts you can rely on for all your sand control challenges. Our passionate team of engineers and innovators works tirelessly to maximize the reliability of your sand face completion design and installation operations.

DuneFront is global

Sand control experts where you need them

01 USA

02 Canada

03 UK

04 Portugal

05 Brazil

06 Burkina Faso

07 Egypt

08 India

09 Malaysia

Our values lead our way:

Quality ■ Efficiency ■ Excellence

Our services, your success

With over 200 years of collective experience, we are the industry's independent sand control advisory. We provide design and evaluation software, consulting, and training services globally for all completion environments. We are the sand control experts, explore how we can help you today:

Software

Our industry standard software empowers you to take the best engineering decisions at every stage of your sand control projects.

Trusted by all major Operators and Service Companies around the world to enhance completion reliability and improve efficiency.

Consulting

We foster a collaborative partnership, working closely with you to develop optimized solutions for your sand control challenges.

Independent and impartial support across all stages of field life, from FEED to remedial.

Training

We help you cultivate, sustain and enhance in-house sand control expertise.

Courses are customized for your specific requirements and delivered globally by our recognized sand control experts.

Our sand control software suite, **PackPro** and **FluidPro**, enhances reliability, improves efficiency, and empowers confident well engineering decisions.

With an intuitive interface and workflows built for engineers, our industry standard solutions deliver impartial guidance and trusted performance, backed by DuneFront's global expertise.

- **Complete solution:** Industry-standard for sand control simulation, evaluation, and optimization.
- **Reduce NPT:** Identify and mitigate risks at every stage of your sand control operation.
- **Fast & reliable results:** Rapid calculations for timely, confident decisions.
- **Versatile toolkit:** Supports advanced features like shunt tubes, ICD/AICD screens, MPGP, and more.

- **First of its kind:** Non-piston flow model delivering realistic fluid displacement simulations.
- **Comprehensive coverage:** Supports all sand control flow paths and displacement operations.
- **Fast & field-ready:** Accurate results in minutes, enabling real-time decisions.
- **Engineer-focused:** Built for sand control engineers, delivering powerful insights with ease.

The industry trusts us

DuneFront supports a wide range of companies with their sand control requirements, including all major Operators and Service Companies as well as many mid-sized and independent companies. Our services scale to meet your needs, however large or small.
